- Re: "The Reopen Our Schools Act of 2021" (S.L. 2021-4) ABC Science Collaborative, Final Report, June 2021

Dear Members,

Enclosed, please find the final report and analysis of data from North Carolina schools operating in Plan A from March 2021 through June 2021.

As directed by the legislation, the NC Department of Public Instruction engaged the ABC Science Collaborative (through the Duke Clinical Research Institute) to collate, analyze, and interpret COVID-19 data from middle and high schools in Plan A. We refer to this initiative as the ABCs of North Carolina's Plan A, and we have posted this final report, an accompanying lay summary and short video, and other materials at this <u>link</u> for your reference.

Final Report for NC School Districts and Charters in Plan A

As of June 29, the NC DHHS had notified the ABC Science Collaborative that 100 school districts and 14 charter schools operated in Plan A from March 2021 through June 2021. All 100 school districts signed data use agreements with us and complied with the legislation.

Those 100 reporting school districts and 14 charter schools represented 2,396 elementary, middle, and high schools and administrative buildings and more than 864,515 students who attended in-school instruction and 160,549 staff who worked in school and administrative buildings. Including students who received online instruction, the districts represented a total of 1,281,202 students.

The charts below show data about COVID-19 primary cases and in-school transmission (secondary) cases through June 25. We also provide district and school policy on physical distancing, the number of students per bus seat, and the number of students and staff who quarantined during the reporting period.

Interpretation

Our analysis of the data shows:

- North Carolina schools did an outstanding job preventing within-school transmission of COVID-19.
 - There is very limited within-school transmission of COVID-19 in schools participating in Plan A.
 - 6,484 primary cases among students and 1106 primary cases among staff
 - 308 secondary cases among students and 55 secondary cases among staff.
 - The estimated secondary attack rate (of all people quarantined who acquired COVID) is <1%
 - Wearing masks is an effective strategy to prevent in-school COVID-19 transmission.
 - Schools that follow the strategies in the NCDHHS <u>StrongSchoolsNC</u> <u>Public Health Toolkit (K-12)</u> and adhere to the mask mandate effectively mitigate within-school transmission of COVID-19 in Plan A.
- Distance does not predict the spread of COVID-19 when students/staff/teachers are masked.
 - Within-school transmission of COVID-19 in Plan A (full in-person instruction with minimal physical distancing) is similar to the within-school transmission in Plan B (hybrid instruction to enable six feet of physical distancing).
 - Masking is adequate to prevent within-school COVID-19 transmission, with no difference between schools requiring greater than 3 feet of distance between students compared to those requiring less than 3 feet. Distance did not predict infection.
 - Data show no difference in secondary transmission between school districts that offered 1, 2, or 3 students to a bus seat.
- Athletics, although safe in NC schools this past year, likely has a higher secondary attack rate than the within-classroom environment.

What This Means for NC Schools

Our scientific analysis of data provided directly from 100 school districts and 14 charter schools in North Carolina from March through June 2021, representing more than 864,515 students and 160,549 staff, indicates that:

- Proper masking is the most effective mitigation strategy to prevent secondary transmission in schools when COVID-19 is circulating and when vaccination is unavailable, or there is insufficient uptake.
 - Plan A full in-person instruction is appropriate for all grades, all schools, when masking is in place. There is not a medical reason to provide Plan B or fully remote instruction if masking is provided
 - Full-capacity bus transportation appropriate, with up to three masked students per bus seat
- Current quarantine guidelines have resulted in more than 40,000 students and staff being quarantined. Thus, over 100 people were quarantined for every within-school infection. Due to the low transmission rate (an estimated secondary attack rate of 1%), and in order to promote in-person education, the State should consider eliminating quarantine for those appropriately masked or vaccinated.

What's Next

These findings, coupled with the current scientific literature for COVID-19 transmission and mitigation strategies for K-12 schools, should encourage the NC DPI and DHHS to consider updating the StrongSchools NC Public Health Toolkit (K-12) for the 2021-2022 school year.

To help school leaders and policymakers in North Carolina, across the nation, and worldwide make data-driven decisions, the ABC Science Collaborative has prepared "COVID-19 and Schools: The Year in Review and a Path Forward" provides a set of key takeaways to help plan a path forward for safely resuming in-person instruction during the 2021-2022 school year.

Thank you for the opportunity to serve and assist the State of North Carolina. We look forward to discussing this with you in the coming weeks.

Regards,

The co-chairs of the ABC Science Collaborative:

Table Definition:

District Size: Defined by baseline numbers of individuals attending in-person school, Small (<5,000), Medium (5,000-15,000), Large (>15,000)

Bus Practice: Districts reported the number of students permitted to share a seat: this could be <2, 2, or 3. Several districts reported different practices or changes during the period of instruction.

Infections: Primary defined as the initial person (student or staff) identified with confirmed or presumptive infections. Secondary defined as persons (student or staff) with confirmed or presumptive infection after close contact with exposure to a case. If the contact occurred in a school setting or school-sponsored event, these secondary cases are typically described as secondary transmissions with the school setting. Appendices
